DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species D, figures 1-3, & 5a-5c read on claims 1-13, and 17-21 in the reply filed on 9/2/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,12-13,17,19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Denk (US 4,968,911).

Regarding claims 1 and 17, Denk discloses a simulated slot electric motor comprising: a housing (62), a rotor (42), a stator having, a magnetic flux tube (56), a plurality of field windings (49-51) at least partially disposed in a plurality of simulated slots (see fig. 2, where coils 49-51 occupied), and a plurality of electrical connections (53-54) connected to the plurality of field windings configured to connect to a motor control package, wherein the plurality of field windings are at least partially retained within the inside diameter of the magnetic flux tube.

Regarding claims 9-12,18-21, it is noted that Denk discloses all the recited limitation of the claims.

Allowable Subject Matter

4. Claims 2-8, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
